*Personal protective equipment.

4 FITTING SIZES

- 1. SLIM:** follows the lines of the body.
- 2. REGULAR:** normal, neither slim nor loose.
- 3. COMFORT:** comfortably loose, also for jackets that are padded or have several layers or removable linings.
- 4. OVERALL:** very loose, typically for clothing such as rainwear that goes on top of multiple layers.

THERMAL RATING

INDICATIVE THERMAL RESISTANCE

The class is determined by these factors: type of outer fabric, fitting, weight and quality of the padding.

n /tuːkaˈnata/ [word comprising the noun *Tucano* (*Urbano* implied) + the suffix *ata*, coined in Milan at the end of the '90s when the city was invaded by swarms of motorcyclists wearing personalised helmets with donkey, mouse, cat and other animal ears]

1. Product or characteristic of a product which solves the problems and meets the needs of scooter and motorbike riders in an innovative, creative, unexpected and, why not, ironic way.
2. (ext.) Innovative unexpected gesture or creative gimmick whose originality expressed in an ironic, irreverent and, at times, visionary way, is a constant surprise.

LEG COVER AND HAND GRIP COVERS

Scooters are nippy in the city, fast, light, clean and trustworthy: that's the way it has to be in winter too. We can't be ruled by the weather and there's no time to waste putting on heavy gear, so the natural choice for the winter season is Termoscud®: the original leg cover.

TERMOSCUD

SGAS

TERMOSCUD® PRO

The evolution of the original Termoscud® leg cover, with new 4 SEASON SYSTEM to extend the period of use of the leg cover.

R176PRO

Hydroscud®

Insulation

PPE RAINWEAR as required by EN 343:2008

 X-black

Scan the QR to find out all the details.

Check the available video tutorials.

Thanks to the 4 SEASON SYSTEM, the new Termoscud® PRO offers the following advantages:

- During winter it guarantees maximum warmth and prevents flapping at high speed thanks to the patented anti-flap inflatable system (S.G.A.S.) fitted with a new valve.
- During the summer there is no need to remove it from the scooter: just remove the winter part and leave the rigid spoiler fixed to the bodywork, from where an emergency rain cover and practical seat cover can be pulled out when needed.

  Category 1 PPE (Personal Protective Equipment) as of standard CE EN 343:2008.

- HYDROSCUD® construction to guarantee waterproofing:
 - Outer cover in resistant and waterproof 1680 Ballistic and Dobby polyamide
 - Taped seams
- Thick winter quilt that can be removed in summer
- S.G.A.S.: patented anti-flap inflatable system, with valve fitted with incorporated cap and watertight closure (p.11)
- S.G.A.S. adapter included for manual/pump inflation: makes pumping hygienic and prevents air leakage when the valve is being closed
- Anti-theft ring
- Large storage pocket

- Seat cover stored in the bib, available also in the summer version
- Emergency rain cover for use in summer
- Reflective profile and prints
- Smart Holder System: designed for waterproof smartphone pouch holder* (sold separately - code 468 - p. 149)

Featured in the ADI Design Index 2019 - category Design for the individual.

*Not available on R188PRO and R062PROG models.

Can be fitted without a mechanic or specialist.

Cleaning instructions: use the detergent SCUDWASH - cod. 306BOX (p.23) or a damp cloth, rinse and dry the tapes well before storing in a dry place.

  **Category 1 PPE (Personal Protective Equipment) as of standard CE EN 343:2008.**

The evolution of the original Gaucho leg cover, with new 4 SEASON SYSTEM to extend the period of use of the leg cover. Thanks to the 4 SEASON SYSTEM, the new Gaucho PRO offers the following advantages:

- For commuting during the winter months, it guarantees full thermal protection and avoids flapping at high speed by means of the patented S.G.A.S. system fitted with a new valve.
- For touring use and, when needed, all year round, it can be easily and quickly removed from the motorbike: just detach the tapes that fix the leg cover to the plate on the fuel tank.

- HYDROSCUD® construction to guarantee waterproofing:
 - Outer cover in resistant and waterproof 1680 Ballistic and Dobby polyamide
 - Taped seams
- Thick winter quilt
- S.G.A.S.: patented anti-flap inflatable system, with valve fitted with incorporated cap and watertight closure
- S.G.A.S. adapter included for manual/pump inflation: makes pumping hygienic and prevents air leakage when the valve is being closed

R194

LINUSCUD

Legcover – No fixing points on motorbike/scooter.

Waterproof

Insulation

one size

X-black

- Leg cover
- Quick and easy to put on using the strap and rear adjustable neoprene strap
- No fixing points on motorbike/scooter
- Ergonomic design
- Side slits ensure freedom of movement (feet on ground)
- Three-layer construction:
 - waterproof outer shell
 - waterproof internal membrane
 - fleece thermal lining inside legs

- Can be secured to the seat when parking
- Built-in bib
- Reflective graphics
- Pocket transforms into a compact pouch

At speeds above 50 km/h, the strength of the turbulence jeopardizes the air protection. For frequent use at high speeds, we recommend the use of our Termoscud® equipped with patented anti-flap inflatable system S.G.A.S.

SCUDWASH

Detergent spray specifically for cleaning Termoscud®, Gaucho and polyamide hand grip covers.

- Detergent spray specifically for cleaning Termoscud®, Gaucho and polyamide hand grip covers
- Will not damage the fabric
- Does not affect the waterproofing
- Spray on the fabric and leave it to act for a few minutes
- Rinse with a sponge for an optimal result
- Washing type recommended only for Termoscud®, Gaucho and polyamide hand grip covers
- Do not rinse in a washing machine or with a pressure washer to avoid damage to the fabric
- For sale in a 6-pack box

CLOTHING

It doesn't matter whether you're scootering for fun or doing serious riding: you're about to be hit by something totally new - if you are not already smitten get ready for a feeling of pride, of belonging.

With Tucano Urbano's line of bike and scooter clothing you'll find comfort, protection and a great look, plus a whole series of simple but effective technical devices.

This pictogram signals protective jackets for motorcyclists, certified in accordance with directive **EN17092:2020**.

Our jackets are CE - **Class A** certified to offer motorcyclists adequate protection against abrasion, ripping and impact without limiting the rider's movements, **when used on-road**; they have not been designed for particular activities or specific uses.

Abrasion and rip protection is guaranteed by high tenacity fabrics and resistant seams; the main impact zones, such as shoulders and elbows, have incorporated CE approved armour while there is a pocket on the back for specific armour.

The jackets certified in accordance with directive EN17092:2020 undergo the following tests:

- **Rip** resistance
- **Tear** resistance
- **Abrasion** resistance
- Impact force absorption
- Compliance with **specific requirements** regarding indications of the **size**, **quality** of the materials and **ergonomic characteristics**.

The tests are carried out and guaranteed by **specialised certification bodies**.

Read the information leaflet attached to the item for all technical information and indications about the limits of its use

OUR SYSTEMS

HYDROSCUD® is the registered system that guarantees waterproofing and breathability. 100% waterproofing against rain is guaranteed either by an inner membrane or the use of coated fabrics together with water run-off flap and taped seams.

The **COMFORT PROTECTION SYSTEM** is made from the best materials compliant with European standard EN 1621-1:2012, to guarantee safe, light-weight and ergonomic protection. The technical characteristics of the armours and the study of their correct position in the garment offer an unrivalled level of comfort and fit (see p. 180).

REFLECTIVE® SYSTEM

Visibility on demand

On the other hand, water repellent fabric causes water to run off, without being absorbed by the fibres. The duration of treatment will vary with the repellent used.

REFLECTIVE® SYSTEM is the registered system for Visibility on demand with retractable reflective inserts.

During your journey the inserts can be kept in view to maximise safety and, on arrival, they can be hidden under the cuff, collar or hood for maximum style.

MILANO 1999

CAPSULE COLLECTION

BORN AND RAISED ON THE ROAD.

Tucano Urbano was established in **1999**, in Milan: a city whose streets are teeming with scooterists every day. The brand was born with them and for them, with visionary and lighthearted brainwaves, like **Termoscud®**, the leg cover for scooters that is now synonymous with category.

CLOTHING MAN F/W - 12 MONTHS

  Class **A** - CE approved jacket as of **EN17092:2020** standard, to provide riders with adequate protection against abrasion and impact, without limiting riding ability.

- Laminated down jacket
- **HYDROSCUD®**: innovative construction 5-ply for waterproofing and solidity of the chambers
 - 1st ply: tough Taslan polyamide outside with WR treatment
 - 2nd ply: first breathable inner sheet, high water column resistant
 - 3rd-4th ply: first and second mesh woven together so as to form the chambers for padding
 - 5th ply: second breathable inner ply, high water column resistant
- Thermostatic Aero 3D mesh lining
- Ecodown padding

• Taped seams

• **COMFORT PROTECTION SYSTEM:**

  **EN 1621-1** Shoulder (code 8014)

  **EN 1621-1** Elbow (code 8012)

- Pocket for back armour
- Adjustments on collar, cuffs and hem
- Large external double compartment pockets with WR zip
- Internal cargo pocket
- Waterproof inside chest pocket

- Waterproofness 5000 mm
- Breathability 5000 g/m²/24 h
- Length 72 cm (size 50 IT-L)

DOWN JACKET COMPARISON

1st GENERATION

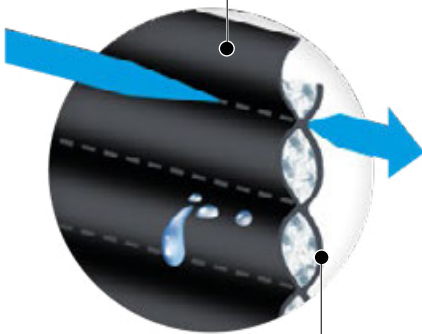

LOT PACK

QUILTINGS

- Outer fabric with waterproof treatment
- Inner lining

1st ply: outer fabric.

2nd ply: Inner lining.

2nd GENERATION

PLUSMATICO

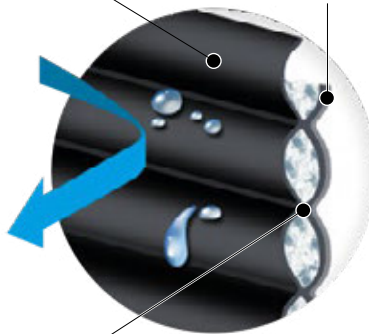

WELDED QUILTINGS

- Waterproof external outer fabric, coupled with breathable membrane
- Lining tape bonded with the 1st mesh to form the chambers

1st two-ply fabric: outer fabric, with WR treatment and breathable membrane.

2nd fabric: polyester lining tape.

The two fabrics are glued together to form the chambers.

3rd GENERATION

HIFIVE

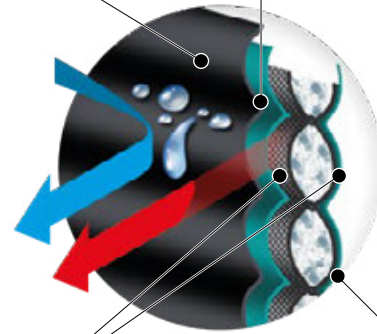

KNITTED QUILTINGS

- Unique waterproof outer fabric, coupled with breathable membrane
- Pre-built weaving chambers
- Back of the fabric with directly taped membrane

1st ply: tough Taslan polyamide outside with WR treatment.

2nd ply: first breathable inner sheet, high water column resistant.

3rd-4th ply: first and second mesh woven together so as to form the chambers for padding. The seamless construction avoids any water ingress and maintains a perfect waterproofness over time.

5th ply: second breathable inner ply, high water column resistant, to enable a hermetic welding of the seams.

BENEFITS

2nd and 3rd GENERATIONS VS 1st GENERATION

WATERPROOFNESS: thanks to the lack of seamed quiltings.

3rd GENERATION VS 1st and 2nd GENERATIONS

RESISTENCE: the woven chambers are less subject to wear: they have a superior resistance and they can't unstuck during washing.

COMFORT: the lack of multiple layers of glue makes the product lighter and softer.

SEAM TAPING: seam tapings directly on the back of the fabric.

GLOVES

Useful information

When choosing your gloves you should think about what you need in terms of heat insulation and sensitivity in your hands: a bulkier glove will offer better protection against the cold while a slimmer glove will offer you greater sensitivity when riding. In the case of leather gloves you should choose a fairly tight-fitting size as the leather will adapt to your hands with use. Finally, always try on different sizes to find the right one for the characteristics you want!

This symbol indicates “**protective gloves for motorcycle riders**” in compliance with the **EN 13594** standard.

The **EN 13594** standard applies to **protective gloves for motorcycle riders on roads**.

This type of glove **protects the hands and wrists from exposure to weather** and, in the event of accidents, **from impacts** with other vehicles/roadside infrastructure/road surfaces.

Gloves that comply with the EN 13594 standard must pass the following tests:

- **Tear** resistance
- **Cut** resistance
- Resistance to **abrasion**
- **Impact** resistance
- Compliance **with specific requirements** for indications of **size, quality** of materials and **ergonomic characteristics**.

The tests are carried out and certified by specialized third party laboratories.

RAINWEAR LINE: EVEN MORE RAINPROOF.

Our **RAINWEAR LINE** has been designed to meet the needs of **all types of scooter/ motorbike riders**: starting with those who ride **only occasionally** to those who prefer **not to be caught out by the bad weather**; from riders with many years of experience to those with a passion for **road adventures**. In addition, our new rainwear line has also been designed to meet the needs of every type of journey: from short and medium trips, right up to long distance journeys.

The new clothing items have been made with the **HYDROSCUD®** system to ensure **that they are fully rainproof** in accordance with the theoretical requirements of **EN 343:2008****, and that they meet the practical requirements of **EN 14360:2004** which defines test conditions for ready made garments under inclement weather conditions.

The **CE** marking affixed to the **PPE (Personal Protection Equipment***)** provides the conformity of the product to **EN 343:2008** standard for rainproof clothing. This standard specifies the requirements and test methods applicable to the materials and to the seams normally used in this type of clothing to protect the wearer against the effects of rain, snow, fog and moisture (please read the information notice attached to the item).

In order to establish whether **not only the fabric but also the entire garment** are fully waterproof, the new rainwear line has undergone the **RAIN TOWER TEST**, according to **EN 14360:2004** standard.

The Tucano Urbano **HYDROSCUD®** registered system guarantees the co-presence of **IMPERMEABILITY, BREATHABILITY, TAPED SEAMS AND WATERPROOF CONSTRUCTION**.

*Excluding the Set Diluvio Start.

**Valid for Set Diluvio Pro, Diluvio Pro Jacket, Diluvio Pro Trousers, Set Diluvio Plus, Diluvio Plus Jacket, Pantaloni Diluvio Light Plus, Zip Fastener Plus Trousers.

ACCESSORIES

For Tucano Urbano people these aren't accessories... but essentials.

They say you can always tell a real biker by his accessories! So, we have decided not just to look after your smallest needs, but also to let you have fun, breaking free of the humdrum city life and adding a little bit of irony.

Just little things that make a big difference!

TUCANOURBANO

TECHNOMERINO

TECHNOMERINO by Tucano Urbano  **MERINO WOOL + POLYESTER.**

SOFT AND DRY.

The polyester keeps the fabric pleasantly soft on the skin and helps convey moisture outwards.

WITH YOU FOR EVER.

The Technomerino garments are made to last, are machine washable, do not shrink and dry rapidly.

WARM AND COMFORTABLE.

Merino wool

- has excellent insulating properties and keeps you warm even in extremely low temperatures thanks to the fibre with a diameter of less than 20 thousandths of a millimetre;
- absorbs moisture up to 35% of its specific weight, and then releases it, offering effective temperature control;
- has a natural anti-bacterial action that neutralises odours.

647

COLLARINO

One size

N-black

Breathable

Insulation

- Multi-use four seasons tube collar
- TECHNOMERINO: 50% merino + 50% polyester
- 3 Modes of use: 1. neck. 2. balaclava. 3. hat
- Machine washable and quick drying

646

- Protects neck, face and forehead
- Machine washable and quick drying

TUCANOURBANO

TECHNOMERINO

TECHNOMERINO by Tucano Urbano

MERINO WOOL OUTER, POLYESTER INNER.

SOFT AND DRY.

The inner polyester layer

- is pleasantly smooth and soft on contact with the skin;
- does not absorb moisture but conveys it outwards, keeping the skin dry.

WITH YOU FOR EVER.

The Technomerino garments are made to last, are machine washable, do not shrink and dry rapidly.

WARM AND COMFORTABLE.

The outer merino wool layer

- has excellent insulating properties and keeps you warm even in extremely low temperatures thanks to the fibre with a diameter of less than 20 thousandths of a millimetre;
- absorbs moisture up to 35% of its specific weight, and then releases it, offering effective temperature control;
- has a natural anti-bacterial action that neutralises odours.

SAFETY ARMOUR

For us safety means protection, visibility and comfort.

Impact and abrasion protection alone do not guarantee safety on two wheels; it is also essential to be visible, day and night, in the rain and in the fog; maximum comfort is also important to help your concentration and attention on the road.

For these reasons, right from the design stage we pay utmost attention above all to active safety – for example, reflective inserts and high visibility fabrics – and passive safety – that is, certified armour, anti-abrasion fabrics, absence of blunt objects.

Many of our products are certified or type-approved in accordance with EC regulations, an important guarantee of quality and performance. During the certification process we do not aim only for compliance with the minimum requirements of the standard but set our sights higher and use better materials: D30® and CPS for the armour. Because style and design for us must also and in any case go hand in hand with safety.

STREET TOWN

The **COMFORT PROTECTION SYSTEM** is made from the best materials compliant with European standard EN 1621-1:2012, to guarantee safe, light-weight and ergonomic protection. The technical characteristics of the armours and the study of their correct position in the garment offer an unrivalled level of comfort and fit.

8012

ELBOW-KNEE COMFORT ARMOUR

- CE EN 1621-1:2012 approved elbow-knee armour (pair) - Level 1
- Light weight: 72 g.
- Soft texture for a better comfort and fit

8014

SHOULDER COMFORT ARMOUR

- CE EN 1621-1:2012 approved shoulder armour (pair) - Level 1
- Light weight: 72 g.
- Soft texture for a better comfort and fit

8016

D30® 2 BACK ARMOUR FOR POCKET

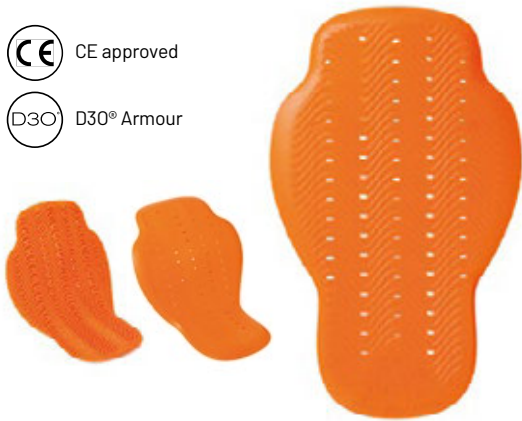

(armour dimension: 44 cm)

- VIPER PRO CE EN 1621-2 approved back protector for pocket - Level 2
- D30®: soft and comfortable material during use. on impact, the material hardens improving shock absorption and protection for the user

CE CE approved

D30 D30® Armour

8006

D30® BACK ARMOUR FOR POCKET

(armour dimension: 44 cm)

- CE EN 1621-2 approved back protector for pocket – Level 1 (standard protection)
- D30®: soft and comfortable material during use; on impact, the material hardens improving shock absorption and protection for the user

CE CE approved

D30 D30® Armour

8002

D30® ELBOW ARMOUR

- CE prEN 1621-1:2011 approved elbow armour (pair) – Level 1 (standard protection)
- D30®: soft and comfortable material during use; on impact, the material hardens improving shock absorption and protection for the use

CE CE approved

D30 D30® Armour

8004

D30® SHOULDER ARMOUR

- CE prEN 1621-1:2011 approved shoulder armour (pair) – Level 1 (standard protection)
- D30®: soft and comfortable material during use; on impact, the material hardens improving shock absorption and protection for the use

CE CE approved

D30 D30® Armour

8007

D30® KNEE ARMOUR

- CE prEN 1621-1:2011 approved knee armour (pair)
- Level 1 (standard protection)
- D30®: soft and comfortable material during use; on impact, the material hardens improving shock absorption and protection for the user

CE CE approved

D30 D30® Armour

8008

D30® HIP ARMOUR

- CE prEN 1621-1:2011 approved hip armour (pair)
- Level 1 (standard protection)
- D30®: soft and comfortable material during use; on impact, the material hardens improving shock absorption and protection for the user

8009

PARA BACK

CE EN 1621-2:2014 – Level 2 (maximum protection) back protection.

SAFETY ARMOUR

2 sizes - small / large

Dimensions (waist-shoulders):

1 (small): 46-50 cm

2 (large): 51-55 cm

- CE EN 1621-2:2014 – Level 2 (maximum protection) back protection
- Soft structure for improved wearability
- Elastic adjustment on sides
- Velcro closing adjustment strip

NOTES

Key for registration year:

> 2000 = from 2000 included.
< 2000 = until 2000 included.

* Suggested compatibility.
Confirm actual fitting with your mechanic.

S.G.A.S.:

S.G.A.S. INFLATABLES

Codes for Termoscud® X-N colour:

- R316-4 (62 cm)
- R316-5 (72 cm)
- R316-6 (82 cm)

Codes for Termoscud® PRO:

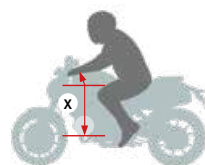

- R316PRO-3

GAUCHO

R1200PRO - Specific for BMW R1200GS (from 2013) and BMW R1250GS (from 2018)

R120 - Specific for BMW R1200GS (until 2012)

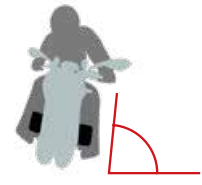

R118/R119 - BUYING GUIDE

X < 76 cm = R118
X > 91 cm = R119
77 cm < X < 90 cm = R118 o R119
how to choose?

R118:
deeper lean angle,
smaller feet coverage.

R119:
shallower lean angle,
larger feet coverage.
